

Are you interested in pursuing research?

Do you plan on going to graduate school?

Do you want/need to **learn how to code**?

Are you an Aquatic Biology, Biology, Microbiology, or Wildlife Biology undergraduate major?

If you answered **yes** to any of the above, then a working knowledge of R is a great skill to have! R is a popular statistical computing language that helps biologists organize, analyze, and visualize data.

Scan the QR code if you want more info on this new course!

R for Biologists
